ABSTRACT OF THE DISCLOSURE:

POST FOAMING COMPOSITIONS

A post foaming composition which comprises an aqueous medium which includes therein:

- at least one primary surfactant;
- iii) a biliquid foam which comprises an aqueous medium as the continuous phase and a water-insoluble liquid having a boiling point in the range of from 25 to 72°C as the internal phase;

wherein the water-insoluble liquid which is incorporated into the biliquid foam as the internal phase is chosen so that, in use, the said liquid vaporises and either spontaneously causes the composition to foam or, when the composition is applied to a surface and rubbed, causes the composition to foam.
